

K-FLEX EC

K-FLEX EC (Bomba Class 0)

Elastomeric Closed Cell Insulation Thermal & Acoustic Insulation For HVAC/R

K-FLEX EC

“K-FLEX is the world’s leading manufacturer of elastomeric insulation systems. In seventeen production facilities around the world, including Poland, France, China, India, Korea, Malaysia, Dubai, Egypt, the UK and the USA some 3,500 employees develop and manufacture outstanding product solutions for thermal and acoustic insulation.

K-FLEX is committed to ensuring its products comply with the fire safety and industry-wide safety standards.

K-FLEX has 63 sales offices on five continents, offering premium service to more than 50,000 customers.

As the world’s fastest-growing company in the industry, K-FLEX is also a global player in the target markets of building services, refrigeration, air conditioning and ventilation, rail, shipping, automotive and beverage industries as well as the solar industry and OEM businesses.

K-FLEX has ISO 9001 and ISO 14001 certification.”

PLANT TIMELINE

K-FLEX EC is a multi purpose flexible elastomeric thermal insulation with a built-in vapour barrier and a closed cell structure, this make K-FLEX insulation a high resistance to water vapour transmission which in turn enable the material to maintain a high level of energy conservation efficiency.

K-FLEX EC is a dust and fibre free insulation that make it an ideal product for apartments, commercial buildings, industrial plants, oil & gas industry, marine and offshore applications.

K-FLEX EC is the ideal choice for:

- Refrigeration pipework
- Hot water piping system
- Ducting system
- Large pipe and tanks
- Chilled water piping system
- Drainage system

With 14 plants worldwide, K-FLEX can uniquely provide on-time delivery, consistent product quality and a highly competitive price.

ADVANTAGES

Low flame spread

When fire tested K-FLEX EC, it does not generate flaming droplets, and has a low fire propagation index. These results meet the fire performance requirement of Class “0” as defined in Building Regulations. Further guarantee is given by supervision contracts with independent laboratories and certification bodies.

High water vapour diffusion resistance

K-FLEX EC closed cell elastomeric insulation has a high water vapour diffusion resistance factor μ , that minimizes water vapour penetration, providing excellent long term performance.

Very low thermal conductivity

K-FLEX EC thermal conductivity is λ 0°C = 0.034W/(m·K). The thermal conductivity coefficient is the most important factor in calculation focused on energy saving.

TECHNICAL DATA

Brief description	Flexible elastomeric foam, closed-cell insulation material
Material type	Nitrile Butadine Rubber
Colour	Black
Assembly	Light weight and flexible. Closed cell structure means no additional vapour barrier is required.

Property	Value/Assessment	Special Remark
Temperature Range	Max. service temperature: +116 °C Min. service temperature: -45 °C	Tested acc.to EN 14706, EN 14707 and EN 14304
Thermal Conductivity	$\lambda \leq 0.035$ W/(m.K) at +20 °C $\lambda \leq 0.034$ W/(m.K) at 0 °C $\lambda \leq 0.032$ W/(m.K) at -20 °C	Tested according to DIN EN 12667, EN ISO 8497
Water vapour diffusion resistance	Water vapour diffusion resistance: $\mu \geq 7,000$ Water Absorption % by volume < 1.1	Tested acc. To EN 12086, EN 13469 Test acc to ASTM C 209
Fire performance	Surface Spread of Flames: Class 1	Surface Spread of Flame: tested according to BS 476 Part 7:1997 Self-extinguishing, does not drip, does not spread flames
Other Fire Class	V0, 5VA Class 1 supervised M1 - NF supervised Class "0"	UL 94 Italy CSE RF 3/77 France Bomba
Chemical behaviour	Excellent resistance to ozone, oil and chemicals (consult product test list).	
Other certificates	Anti microbial Greenguard Low VOC	Tested acc. To ASTM G21 Tested acc. To ISO 17025 Tested acc. To ISO 16000 part -3, -6, -9, -11
Density	48 to 70 kg/m ³	
UV resistance	For UV protection K-FLEX finish paint required	

For temperatures below -50 °C please contact our Customer Service Center to request for the corresponding technical information.

The reaction to fire classification is valid on metal or solid, mineral surfaces.

Further documents such as test certificates, approvals and the like can be requested using the registration number given.

K-FLEX reserves the right to change data and technical requirements without notice.

PIPE INSULATION THICKNESS RECOMMENDATIONS

Self adhesive sheets available in all sizes.

PACKAGING ▶

K-FLEX EC TUBES AND SHEETS

K-FLEX EC Tubes

Measurements:
2.1m x 0.394m x 0.32m

K-FLEX EC Sheets

Polyethylene bags
The bags allows for outdoor storage during the sorting stage.

Measurements:
0.5m x 1.23m

INSTALLATION ▶ FITTED PIPES

Use only the sharpest knife for cutting - this makes the subsequent gluing far easier.

We recommend using the K-FLEX cutter which is ideal for longitudinal cuts.

The use of the cutter is illustrated in these two diagrams. Let the blade run along the tube without the tool's surfaces touching it to get a neat, clean cut.

Position the tube so that the edges are separated, and apply an even layer of K-FLEX K-414 glue.

Once the glue has dried, reseal the tube, pressing the edges firmly together.

INSTALLATION ▶ INSULATION DUCTINGS

There are considerable advantages in using K-FLEX EC ROLL SHEET for ducting, which has the same height as the sheeting.

Take the measurements of the ducting section to be lagged.

Use thinner to thoroughly clean the surface to be insulated. Insulation is not recommended where there is incrustation or other flaws which could prevent the sheeting from sticking perfectly.

Cut the corresponding portion out of the roll. There is an obvious saving in material by cutting the sheeting along its height (a) rather than along the length of the 1000 mm sheeting (b).

Glue the side of the sheeting to be stuck to the conduit and glue the conduit surface, then apply the sheeting, keeping it taut at the corners.

Cover the corner where the edges join with adhesive insulating tape. Compared to a similar operation carried out with 1000 mm sheeting, as well as the saving in material, there has only been one cut in the application.
